OBJECTIVE

Frontend Developer skilled in building fast, scalable, and modern web/mobile apps using React and React Native. Passionate about clean UI, reusable components, and turning UI/UX designs into responsive, maintainable code.

CORE SKILLS

Languages:

- JavaScript, TypeScript.

Frontend:

- HTML, CSS, Tailwind CSS
- React.js
- React Native

EXPERIENCE

Freelance Frontend Developer - Recon Brothers

October 2025 - November 2025

- Implemented frontend logic and modern UI/UX designs.
- Refined and modernized existing website designs, improved visual consistency while optimizing components performance and responsiveness.

Freelance Frontend Developer - Paysabil

November 2025 - Present.

Mobile application built using React Native.

- Collaborated closely with UI/UX designers to deliver a polished and user-friendly interface for Android and iOS.
- Implemented frontend logic and contributed to improving user experience and app performance.

Strengths:

- Responsive, accessible UI development
- Component-based architecture
- State management and reusable UI patterns
- API integration (REST, async/await, fetch)
- Git & GitHub – version control, branching, commits, pull requests.
